Item V

Reference is made to the following documents:

D1: WO02072746-A

D2: WO02072747-A

D3: WO9839406-A

Novelty (Article 33(2) PCT)

There is no explicit disclosure in any of the cited art of a bleaching composition comprising all the features of present claim 1. It follows that there is also no disclosure of the claims dependent thereon or of a method using said composition according to claim 17.

Novelty of claims 1 - 17 is thus acknowledged.

Inventivity (Article 33(3) PCT)

The present application addresses the problem of maintaining the activity of bleaching catalysts in the presence of terpene perfumes. The solution posed is to incorporate an antioxidant, according to claim 1.

D1 discloses bleaching compositions comprising ia. transition metal complex catalysts and antioxidants. D1 also exemplifies bleaching compositions comprising perfume. However D1 does not discuss the problem associated with terpene type perfumes and transition metal type catalysts namely the reduction in activity. Moreover D1 does not suggest the solution to said problem, to use a composition according to claim 1.

Although D3 does disclose the use of terpene type perfumes with transition metal complex catalysts, D3 does not mention the problem of reduced activity or the solution to said problem.

Thus the skilled man would not be motivated to combine the teachings of D3 with those of D1.

Inventivity of claims 1 - 17 is thus acknowledged.
